NOT A CYBERSECURITY MONITOR OUTREACH PROGRAM MEMBER?

JOIN TODAY.

Paragon Systems is the Cybersecurity Monitor (CSM) for the State of Texas. The purpose of the Cybersecurity Monitor is to develop promote voluntary collaborative discussion on cyber and physical security between the Public Utility Commission of Texas (PUCT), Electric Reliability Council of Texas (ERCOT), and participant Monitored Utilities (MUs) by which Monitored Utilities can express awareness and preparedness through their governance, practices, and training.

Contact Terence Gill at terence.gill@parasys.com to learn more about program benefits such as internal and external environmental benchmarking, knowledge sharing engagements, and remote table top events.

THANK YOU TO OUR SPONSORS!

Founded by former risk managers, SecurityGate.io is the fastest and easiest way for organizations to understand where their OT/ICS risks are and what to do about them. The SecurityGate.io platform has been adopted by over 60% of the top US energy producers such as Chevron, Modec, Westlake Chemical, and was recently named in Gartner's Market Guide for Operational Technology for the second year in a row.
